Challenge: Founder

Category: General information

Date: 04/02/26

I. Objective

To identify the founder associated with a well-known hacker gathering.

II. Background

In hacker culture, many influential figures are known by aliases rather than real names. One of the most recognized figures is Jeff Moss, also known by his handle "Dark Tangent."

He is the founder of DEF CON, one of the largest and most influential hacker conferences in the world. His alias is widely used in cybersecurity communities, making it a key identifier in challenges like this.

III. Tool Used

- **Search Browser -** Used to search information

IV. Methodology

1. Searched for the founder of major hacker events
2. Identified the alias associated with the founder
3. Submitted the answer

V. Result

Tangent

VI. Explanation

The challenge prompt "Founder" refers to identifying a key individual behind a major hacker-related event. Research shows that Jeff Moss, under the alias "Dark Tangent," is the founder of DEF CON.

Since hacker communities commonly use aliases, the challenge expects the handle rather than the real name. "Dark Tangent" is strongly associated with DEF CON and is widely recognized in cybersecurity culture.

Thus, the correct answer is the alias “Dark Tangent.”

VII. Conclusion

By identifying the founder of DEF CON and recognizing the use of hacker aliases, the correct answer—Dark Tangent—was determined
