Challenge Description

I am a huge cyber security conference that run every year in three places : San Francisco, Singapore and Lately AbuDhabi. Who am I ? No spaces in answering

Answer

Author: The Analyst: Hyposelenia

Challenge: Business Gathering

Category: General information

Date: 04/02/26

I. Objective

To identify a well-known business gathering event related to cybersecurity.

II. Background

In the field of cybersecurity, professionals, researchers, and companies often participate in global conferences to share knowledge, showcase innovations, and discuss emerging threats. One of the most prominent events in this domain is the RSA Conference, commonly referred to as RSAC.

It is an annual gathering where industry leaders, ethical hackers, and organizations come together to discuss security trends, vulnerabilities, and solutions. Due to its scale and reputation, it is widely recognized as a major "business gathering" in cybersecurity.

III. Tool Used

- **Search Browser -** Used to search information

IV. Methodology

1. Searched for keywords related to cybersecurity business events
2. Identified the most relevant and widely recognized conference
3. Submitted the answer

V. Result

RSAConference

Answer

RSAConference

VI. Explanation

The clue "Business Gathering" suggests a formal event where professionals meet, typically in a corporate or industry setting. In cybersecurity, the RSA Conference fits this description perfectly.

By searching for major cybersecurity events, RSAC consistently appears as one of the top global conferences. It involves business leaders, security experts, and vendors, making it both a technical and business-oriented gathering.

Thus, the answer aligns with the clue because RSAC is not just a conference—it is a central hub for business discussions, partnerships, and knowledge exchange in the cybersecurity industry.

VII. Conclusion

The challenge was solved by identifying a prominent cybersecurity business event. Through simple research and contextual understanding, the correct answer—RSAConference—was determined.
